

*The Physician's prescription is carefully compounded by one pharmacist and his work is checked by another.*

## **Devoted Exclusively to Prescriptions**

*Conveniently located on 34th between Madison and Park.*

The registered pharmacists at Eimer and Amend Apothecary have no duties other than compounding prescriptions with meticulous care. This single purpose, together with the most approved laboratory facilities, enables this Apothecary to serve physicians in keeping with their high professional standards.

Prescriptions are filled here with the same high regard for the patient's welfare and the same careful attention to detail that the physician exercises in writing them.

Physicians are invited to visit this modernized continuation of a 91-year-old Apothecary. In addition to the prescription laboratory, there are the aseptic laboratory, the large stock rooms and other facilities essential to the Science of Pharmacy.

# **EIMER AND AMEND APOTHECARY**

**Phone Murray Hill 5-7535**

**New York**

PHYSICIANS' PRESCRIPTIONS for Lilly products could not be filled in Oregon and Vermont, South Africa, and Brazil if test-tube methods were used in drug manufacture. Before a new compound can be made available for general use, the steps devised for preparation in the research laboratory must be adapted to large-scale production. This is a job for chemical engineers in the Lilly Pilot Plant. Here yields may be changed from milligrams to pounds but the final product must meet the original specifications so carefully worked out by the research chemist.

## NO MATTER WHERE YOU PRACTICE . . .

● The day is past when a patient requiring a scientific support must wait long weeks to secure it. Today, doctors can specify Camp Scientific Supports, knowing that they are instantly available in almost every city and town the country over.

They know, too, that the design and construction of Camp Supports are approved

and endorsed by important medical authorities. In addition, Camp Authorized Service assures doctors that their individual prescriptions will be carefully filled by experts—specially trained by the Camp organization—each one a staff member of a reputable department store or specialty shop located nearby.

Will smallpox continue to decline in 1942?

# SMALLPOX VACCINE

*Lederle*

THE new "low" in smallpox incidence reached in this country in 1941 compares most favorably with the perennially high incidence reported in previous years.<sup>1</sup>

	Median
1941	1936-40
SMALLPOX . . . 1,368	9,574

However, we are still far too tolerant of this dangerous disease.

To avert the possible increase in the incidence of infectious diseases, which history has shown is fostered during war time, our government recently made the commendable move of advising the immunization of all children over 6 months of age against smallpox. The success of this program, however, depends on the cooperation of every practitioner, public health official and local governing body alike.

TOOMEY,<sup>2</sup> in a recent analysis of active immunity in smallpox, stressed the integrity of the immunizing agent and the proper technique of vaccination. Lederle now has available "Smallpox Vaccine Lederle" which has been further improved by the addition of Brilliant Green (reducing the bacterial count of the virus). The "take" with this product is quite satisfactory and its viability has not been diminished as compared with glycerinated vaccine cured without the dye.

<sup>1</sup>Pub. Health Rep. 57:23,24 (Jan. 2) 1942.

<sup>2</sup>TOOMEY, J. A.: J. A. M. A. 119:18 (May 2) 1942.

#### PACKAGES

"Smallpox Vaccine Lederle"

### THE KALAK WATER COMPANY OF NEW YORK, INC.

30 Rockefeller Plaza, New York, N. Y., calls attention to the following qualities of its product, Kalak Water, manufactured since 1915 in its two laboratories, Brooklyn, N. Y. and Louisville, Ky.:

1. The distilled water from which Kalak is made, has a conductivity as low as that used in parenteral, pyrogene-free, fluids, namely,  $1.5(10)^{-6}$ Mhos.
2. Kalak, ready for bottling, is sterilized by ultra-violet lamps imparting 2750 Angstrom units to the fluid, adequate to kill coli and other organisms.
3. The electrolyte content of Kalak qualitatively and, relatively, quantitatively, resembles blood plasma elements, such as Na, K, Mg, Ca, etc.
4. Kalak augments the alkali reserve of the blood.
5. Kalak is widely used in sulfa-medication as a buffer.

## THE PHYSICIANS' HOME

**WHO STARTED IT?** A group of physicians in 1918. They recognized the tragedy of their colleagues who were destined to go to local or state charitable agencies. The purpose was to establish and create means, to offer help, and maintain self-esteem for those deserving professional men and women. *THE PHYSICIANS' HOME represents the efforts of this group.*

**WHOM DOES IT SERVE?** Members of the medical profession of New York State, on recommendation from their local county medical society.

**WHERE DOES IT SERVE?** In their own community or as our guests.

**WHO ARE OUR GUESTS?** Aged, indigent physicians in good standing or widows of physicians.

**WHO SUPPORTS IT?** Members of the medical profession in the State of New York by voluntary contributions and legacies.

*We appeal to the profession for continued support for this worthy charity*

**Make checks payable to: THE PHYSICIANS' HOME, 52 E. 66th St., New York**

## RIGHT AT HOME — RIGHT IN MANY LEADING HOSPITALS

Galatest is used routinely in the homes of many diabetics. Also in more and more leading hospitals.

Two big reasons are Galatest's convenience and dependability. No fussing with test tubes and boiling —no liquid measuring. It's a dry reagent for determining urine sugar. One drop of urine on a small

amount of Galatest powder gives an immediate reaction of reliable accuracy.

Galatest is available through your prescription pharmacy in a light portable pocket-kit. Or in vials containing enough Galatest for approximately 100 tests.

# Why MEAD JOHNSON & COMPANY COOPERATES WITH THE COUNCIL

## MEAD PRODUCTS. COUNCIL-ON-PHARMACY ACCEPTED:

Mead's Oleum Percomorphum (liquid and capsules); Mead's Cod Liver Oil Fortified With Percomorph Liver Oil; Mead's Viosterol in Halibut Liver Oil (liquid and capsules); Mead's Cod Liver Oil With Viosterol; Mead's Viosterol in Oil; Mead's Standardized Cod Liver Oil; Mead's Halibut Liver Oil; Mead's Mineral Oil With Malt Syrup; Mead's Ascorbic (Cevitamic) Acid Tablets; Mead's Thiamine Hydrochloride (Thiamin Chloride) Tablets; Mead's Nicotinic Acid Tablets; Mead's Menadione in Oil.

## MEAD PRODUCTS. COUNCIL-ON-FOODS ACCEPTED:

Dextri-Maltose Nos. 1, 2, & 3; Mead's Dextri-Maltose With Extracts of Wheat Embryo and Yeast (formerly Dextri-Maltose with Vitamin B); Pabulum; Mead's Cereal; Mead's Brewers Yeast (powder and tablets); Mead's Powdered Protein Milk; Mead's Powdered Lactic Acid Milk Nos. 1 and 2; Alacta; Casec; Sobee; Olac; Mead's Pectin-Agar in Dextri-Maltose.

ALL MEAD PRODUCTS  
ARE COUNCIL-ACCEPTED

**VOLUNTARILY**, we market only Council-Accepted products because we have faith in the principles for which the Council on Pharmacy and Chemistry (and the Council on Foods) stand.

We have witnessed the three decades during which the Council has brought order out of chaos in the pharmaceutical field. For over thirty years it has stood—alone and unafraid—between the medical profession and unprincipled makers of proprietary preparations.

The Council verifies the composition and analysis of products, and substantiates the claims of manufacturers. By standardizing nomenclature and disapproving therapeutically suggestive trade names, it discourages shotgun therapy and self-medication. It is the only body representing the medical profession that checks inaccurate and unwarranted claims on circulars and advertising as well as on packages and labels.

The Council, through N. N. R. and in other ways, augments the work of the U. S. Pharmacopoeia, testing and evaluating scores of new products which appear during the 10-year interim between Pharmacopoeial revisions.

We are conscious of the fact that the Council has at times been criticized both in and out of the medical profession. We hold no brief for perfection in any human agency. But we subscribe to the fact that the work of the Council is sound in principle; and in this high-pressure day and age, we shudder to think of a return to the unrestrained patent-medicine-quack-nostrum conditions of three decades ago, when there was chaos instead of Council.

# *Dramatically Improved to Provide*

... maximum stability

... full potency at time of use

HERE is startling news—Follutein Squibb (chorionic gonadotropin N. N. R.) and Phykentrone (Anterior Pituitary Extract Squibb) are now processed by the Cryochem method. By this method vials of these products are subjected to temperatures far below the freezing point, dehydrated under high vacuum and sealed with a rubber-diaphragm cap. The final product is a porous fragile water-soluble substance. A 10-cc. vial of sterile diluent containing a preservative (0.5% phenol) accompanies each package.

**The New FOLLUTEIN** (*chorionic gonadotropin*)  
... The new Follutein has a *potency of 5 years*—and even when diluted for use will retain its full potency for 2 months. Not only does this new Follutein possess greater stability but it *completely eliminates the painful reactions* caused by the glycerin in the old product. The new Follutein is supplied in 10-cc. vials of 1,000 I.U., and 5,000 I.U. each and in a new, hitherto unavailable potency of 10,000 I.U. This latter potency is in line with the trend toward administration of higher dosages and

constitutes a forward step in convenience and economy.

**PHYKENTRONE**—*the new Anterior Pituitary Extract Squibb* . . . Phykentrone the Squibb name for the new and vastly improved anterior pituitary extract—is also processed by the Cryochem method. It, too, is far more stable than the product it replaces. In addition Phykentrone is considerably more potent than the anterior pituitary extract formerly marketed, in that the rat-growth unit used for its assay is 5 times as potent. It is available in rubber-capped vials containing 200 growth units with a 10-cc. vial of sterile diluent (phosphate buffer). Phykentrone contains principally the growth hormone, although the presence of the thyrotropic and gonadotropic hormones has been demonstrated.

For literature address the Professional Service Department, 745 Fifth Ave., New York, N. Y.

## **E·R·SQUIBB & SONS**

*Manufacturing Chemists to the Medical Profession Since 1858*

**Before Dilution**—Follutein Squibb (Dried chorionic gonadotropin) appears as a porous, fragile, water-soluble substance at the bottom of the vial.

**After Dilution**—The active substance goes into solution even before dilution is completed. Detachable portion of label may then be removed.

# *During the War...*

## **VITAMINS AT REDUCED PRICES DIRECT TO DOCTORS**

• We are undergoing an economic strain of foreign war and tax burdens at home. Many businesses are closed. Men are out of work and short of funds. Financial data show that the average earnings per capita are reduced. Whenever the economic level is depressed, the food budget is cut. When the American diet is lowered, vitamin deficiencies appear.

*We want our laboratories to serve our people*

**THE DOCTOR IS THE JUDGE.** Every physician has patients who would benefit by appropriate vitamin supplements. Some of these cannot afford to pay the customary drug store prices. Let us help. Your patient gets the benefit. The opinion of the physician is final.

*Ask for our price list direct to physicians*

• In B-Complex, they are combined by NATURE in the oldest and best known vitamin products available to Doctors...

### **BREWERS' YEAST (HARRIS) POWDER**

Contains the full quota of vitamins—thiamin, riboflavin, nicotinic acid, pyridoxine, pantothenic acid, factor W and the six other factors described as factors of the B-Complex.

### **BREWERS' YEAST (HARRIS) BLOCKS**

These 7½ grain blocks are compressed from the same yeast, sold at the price of the powder. Such economy has not been offered by any other manufacturers. Contains B<sub>1</sub>, B<sub>2</sub>, B<sub>4</sub>, B<sub>6</sub>, nicotinic acid and yeast cell salts (as above).

### **YEAST VITAMINE (HARRIS) TABLETS**

Contain a concentrate from yeast—more potent than the whole yeast—smaller dosage—all the factors of the B-Complex. Palatable—proven by physicians for 22 years.

### **CRYSTALLINE VITAMINS**

1. Vitamin B<sub>1</sub> (Thiamin) — Tablets and sterile solution for injections.
2. Vitamin B<sub>2</sub> (Riboflavin) — Tablets — usual dosage.
3. Vitamin C (Ascorbic Acid) — Tablets and sterile solution — ampuls.
4. Nicotinic Acid — Tablets — usual dosage.
